

Decision Lens works with leading organizations to bring structure and quality to key decisions. Our comprehensive solutions manage the strategic alignment of goals and priorities with investments in people, projects, products, and suppliers. The result is a more accurate, repeatable, and transparent process for decision making, even when the drivers and considerations are subjective and intangible.

OUR SOLUTIONS

Decision Lens offers the following solutions to assist organizations in streamlining their decision processes:

- Decision Lens Suite™ desktop software generates better decision making through group enablement and consensus, structure, consistency, and repeatability
- Decision Lens Web has all of the interactivity, color, and utility of the desktop version, but is accessed through your browser
- Facilitation and Training include meeting facilitation, decision process analysis and decision documentation, and training

OUR CUSTOMERS

Billions of dollars worth of decisions were made using Decision Lens this past year. Numerous Fortune 500 companies and governmental agencies make crucial decisions every day—and they all rely on Decision Lens to get the job done.
