Financial Management 2.0

Government-grade software for optimizing and justifying your budget.

DECISION LENS

A Modern Budget Planning Process

Organize Data for Action with our centralized, structured framework that optimizes data for real-time planning and rapid action.

Turbocharge Requirements Intake using custom forms to collect, organize, and prioritize requests with direct input into a structured data model.

Prioritize Collaboratively to guarantee the most comprehensive list of priorities by having internal experts score project importance.

Rapidly Analyze Results with powerful algorithms and visualizations to gain immediate insight and make real-time decisions.

Obtain Full Visibility via structured, comparable data that is accessible to individuals across the organization based on roles and permissions.

Plan for the Future, Sustain Today

Connect your processes to effectively meet your mission.

Structured Budget Formulation

Manage pre-decisional data to formulate a more responsive budget.

Spend Plan & Execution Tracking

Instantaneously pivot when off plan by making rapid, informed decisions for a get-well plan.

Automate UFR Process

Efficiently collect, rank, and prioritize unfunded requirements.

Connected Multi-Year Planning

Modernize for the future by gaining full visibility into your budget planning and execution over time.

> *Decision Lens ensures projects of the highest relative merit are consistently programmed, budgeted and executed first."*
>
> - Vice Admiral (retired) Adam M. Robinson Jr., Former Surgeon General of the United States Navy

The Result

Budget Certainty. Adapt to budget changes that promote long-term innovation and success.

Enterprise-Wide Defensibility. See agency-wide impact of high-level decisions and how organizations as a whole are aligning to mission needs.

Lockstep Mission Alignment. Create a collective line of sight to strategy and tie your resources to the lines of effort that most impact your mission.

Unrivaled Scalability & Speed. Gain full visibility into requirements, adjust plans on the fly, and maximize the allocation of resources.
